Coffee exports in September 2024, amounted to 532,212 60-kilo bags, worth US\$ 144.7 million as shown in Fig 1. This comprised of 504,576 bags of Robusta valued at US \$ 137.19 million and 27,636 bags of Arabica valued at US\$ 7.51 million (see Table 1 and Annex 1). This was a decrease of 7.67% in quantity and an increase of 53.79% in quantity and value respectively compared to the same month last year.

The monthly coffee exports volume was lower than the previous year. And was more pronounced in Arabica due to its bi annual off year cycle coupled with poor flowering in Mt. Elgon region. The value of coffee exports was higher as global coffee prices continue to rise as dry conditions in Brazil and Vietnam, the world's largest producers of Arabica coffee and Robusta coffee respectively are seen to affect coffee crop yields and, therefore, a likelihood of supply deficit in 2024/25.

Coffee exports for twelve months (Coffee year 2023/2024) totaled 6.35 million bags worth US\$ 1.4 billion compared to 6.14 million bags worth US\$ 940.1 million in the previous year (Coffee year 2022/2023). This represents an increase of 3.42% and 48.97% in quantity and value respectively.

In September 2024, significant progress was made in enhancing the capacity of 5,174 farmers across coffee-growing regions through 180 specialized training sessions. These trainings focused on Good Agricultural Practices (GAP), Sustainable Land Management (SLM), Climate-Smart Agriculture, and Environmental Management. Training sessions were held in several regions, including Rwenzori, Central, Elgon, Western, Greater Masaka, Northern, South Western, and Eastern, reaching hundreds of farmers in each area. Additionally, 375 soil samples from 402 farmers were collected and analyzed. The results highlighted low levels of organic matter, potassium, nitrogen, and phosphorus, and farmers were advised on appropriate soil amendment measures to improve crop yields. Farmer registration efforts saw 359 farmers, 411 farms, 4 buying stores, 12 hullers, 4 buyers, and 1 coffee nursery registered through the Geospatial Monitoring & Evaluation (M&E) system and the farmer registration App.

Monitoring and evaluation visits were also carried out in the Elgon region, targeting farmers and other stakeholders. Additionally, 14 radio talk shows were aired across various regions to raise awareness about the European Union Deforestation Regulation (EUDR) and promote best practices in coffee management. As part of the UNDP/UCDA support project, 10 water tanks were delivered to Greater Masaka to support the establishment of mother gardens, with 2,000 plants at each of the 10 sites. In South Western Uganda, five sensitization meetings were held to promote coffee traceability registration and compliance with EUDR, involving 46 participants across several districts.

These activities demonstrate UCDA's ongoing efforts to improve the sustainability and marketability of Uganda's coffee while empowering farmers with knowledge and resources for better agricultural practices.
