Inter Continental exchange (ICE) Arabica coffee futures: Closed lower across the board on Wednesday. December position closed at US cents 221.30 per lb losing US cents 3.85 while March position closed at US cents 215.10 per lb losing US cents 3.65 over the previous closing.

Coffee prices on Wednesday closed lower as the dollar index rose to a 20-year high. Strength in the US dollar encourages selling from Brazil's producers. Brazil's harvest pressure is also a negative factor for coffee prices. Cooxupe cooperative, one of Brazil's biggest coffee producers, reported on Wednesday that Brazil's coffee harvest was 99.4% completed as of September 16. Coffee producer sales typically increase during harvest time to make space for storing their newly-picked coffee.
