6. Global Situation

World coffee production for 2025/26 is forecast 3.5 million bags higher than the previous year to a record 178.8 million due to continued recovery in Vietnam and record output in Indonesia and Ethiopia, more than compensating for losses in Brazil and Colombia. World coffee bean exports are forecast 2.3 million bags higher to 123.8 million as gains from Vietnam, Indonesia, and Honduras more than offset losses from Brazil and Colombia. With global consumption continuing to rise to a record 173.9 million bags, ending stocks are expected to drop for a fifth-consecutive year to just 20.1 million bags. In response, coffee prices as measured by the International Coffee Organization (ICO) monthly composite price index have nearly tripled during this period. (United States Department of Agriculture, Coffee: World Markets and Trade report-December 2025).

7. Local Situation

During the month of December 2025, farm gate prices ranged from UGX 6,500-7,000 per kilogram of Kiboko (Robusta dry cherries); UGX 13,000-14,000 for FAQ (Fair Average Quality); UGX 16,500-17,000 for Arabica Parchment; and UGX 16,000-17,000 per kilogram for Drugar. 8. Coffee Development Activities

In December, extensive efforts were undertaken to strengthen coffee production, productivity and improve coffee quality across the country. A total of 105 coffee farmer trainings were conducted nationwide, reaching 2,791 farmers, including 2,005 men, 786 women, 474 youth, 32 PWDs and 329 elderly farmers, reflecting a commitment to inclusive sector development.

The trainings focused on coffee establishment and farm management, covering critical practices such as proper planting and spacing, selection of quality planting materials, shade management, intercropping, and management of newly planted coffee. Farmers were also guided on recommended post-harvest handling practices, aimed at enhancing coffee quality and market competitiveness.

To reinforce on-farm support, 232 farm visits and inspections were conducted across Uganda, reaching 921 farmers. These engagements enabled the identification of key production challenges, notably the continued prevalence of pests and diseases. In response, farmers received targeted technical guidance on water stress mitigation, as well as weeding, pruning, stumping, and the adoption of climate-smart agricultural practices.

Rehabilitation of aging coffee gardens remained a priority during the month, with 97,349 coffee trees stumped by 1,047 farmers, including 575 men and 472 women, to restore productivity in old and unproductive plantations. In support of improved yields and soil health, 34,372 bags of fertilizer were distributed to 9,523 farmers across targeted regions.

Quality assurance and regulatory oversight were also strengthened through inspections of 128 hullers, 157 buying stores, 2 grading facilities, and 18 wash stations, alongside the installation of 10 new wash stations and factories. Additionally, five post-harvest handling and Good Manufacturing Practices (GMP) training sessions were conducted in Greater Mpigi, Elgon, Northern, and Kigezi, reaching 275 participants.

Licensing and enforcement activities during the period covered 66 hullers, 52 buying stores, 4 wash stations, 1 roaster, and 1 grading facility. Quality assurance efforts included the collection of 22 coffee samples for laboratory analysis, support to 96 traders and processors, and the installation of three solar dryers to improve drying efficiency and quality.
